

Release Date: November 26, 2009 IgnitionWeb Version: 3.9

ID	NAME	COMPONENT	CATEGORY	TYPE	SUMMARY
9.1	Recipient Selection Interface	Mailing List Manager	Feature Update	Usability Improvement	Redesigned the "Step 1 - Select Recipients" form for more intuitive profiling and added the ability to select multiple Bookmarks for mailings. The Recipients List is updated in real-time based on the Bookmarks and/or filters selected. Ensured subscribers matching multiple criteria are not duplicated in the final Recipients List.
9.2	Bulk Subscriber Upload	Mailing List Manager	Feature Update	New Functionality	Facilitates the upload of subscriber lists formatted using the MS Excel template download. Uploaded subscribers are added as individual entries in the "Accepted" listing.
9.3	Bulk Subscriber MS Excel Template Download	Mailing List Manager	Feature Update	New Functionality	Added the ability to download a MS Excel template to create bulk subscriber lists to import.
9.4	Recipient Bookmarks MS Excel Download	Mailing List Manager	Feature Update	New Functionality	All Dynamic and Imported Bookmarks can now be downloaded as MS Excel documents from the Recipient Bookmarks listing. Edits to the Excel files can be imported back into the system using the "Upload from Excel" feature to add/edit Subscribers or create new static Imported Bookmarks.
9.5	Bounced Email Tracking	Mailing List Manager	Feature Update	New Functionality	Created the Bounced Subscribers Listing to flag subscribers whose accounts bounce back mailings. Bounced Subscribers can be moved to the "Accepted" or "Refused" Listings, or may be permanently deleted from the system.
9.6	Bulk Actions in Subscribers Listing	Mailing List Manager	Feature Update	New Functionality	Implemented the Bulk Actions feature, allowing Accept/Refuse/Delete actions to be applied at once to multiple subscribers across all states.
9.7	Imported Recipient Bookmarks	Mailing List Manager	Feature Update	New Functionality	Bulk subscriber lists uploaded using the MS Excel template can be saved as static imported bookmarks, to be used for mailings.

Release Date: November 26, 2009 IgnitionWeb Version: 3.9

ID	NAME	COMPONENT	CATEGORY	TYPE	SUMMARY
9.8	Template Style Sheet Generation	Mailing List Manager	Feature Update	New Functionality	Templates created in Mailing List Manager now generate independent CSS style sheets.
9.9	User-configurable Template Options	Mailing List Manager	Feature Update	New Functionality	Email alignment within the viewing pane of the recipient client can be specified by the user when creating a template. The default alignment is centred.
9.10	Rich Text Editor Style Sheets	Mailing List Manager	Performance Enhancement	Optimization	Configured the message composition Rich Text Editor and message preview to pull styles selections from the template style sheet or default mailing style sheet. Can now be customized to incorporate site-specific styles on a per-client basis.
9.11	Rich Text Editor Template Override	Mailing List Manager	Performance Enhancement	Resolved Issue	Specific formatting manually applied in messages now overrides the template format defaults to give users more control and WYSIWYG accuracy.
9.12	Resolved Templated Message Alignment	Mailing List Manager	Feature Update	Optimization	Templates including header images no longer cause text indentation when creating messages.
9.13	Special Characters in Email Subjects	Mailing List Manager	Performance Enhancement	Resolved Issue	Special characters are now accepted in the subject lines of messages created in Mailing List Manager.
9.14	SEO Manager Implementation	SEO Manager	Feature Update	New Functionality	Upgraded SEO Editor to SEO Manager, allowing full control over static site-wide and page-specific meta titles, keywords and descriptions. SEO Manager is a sub-section of EasyText Editor and includes global edits, per-field character counters and a tree structure view to maximize usability.

Release Date: November 26, 2009 IgnitionWeb Version: 3.9

ID	NAME	COMPONENT	CATEGORY	TYPE	SUMMARY
9.15	Google Analytics Tracking	Site Statistics	Feature Update	New Functionality	Added the "Google Analytics" sub-section of Site Statistics to allow users to enter their account ID. The ID is added to the front-end website script to facilitate data tracking and analysis using the third-party tool.
9.16	Top 20 Referrers Update	Site Statistics	Performance Enhancement	Optimization	Improved the accuracy of the "Top 20 Referrers" section of Usage Statistics in Site Statistics.
9.17	Browsers Update	Site Statistics	Performance Enhancement	Optimization	Updated the browsers tracked and listed in the Usage Statistics sub-section of Site Statistics to include latest versions and new products.
9.18	User-configurable Listings	User Interface	Performance Enhancement	Usability Improvement	Users are now able to determine the number of entries they would like displayed on listings pages throughout IgnitionWeb in the "Authentication & Preferences" section of "My Account" (the default is now 50 entries per page).
9.19	Feedback Form Integration	User Interface	Performance Enhancement	Usability Improvement	Created a feedback form within IgnitionWeb, for users to submit issues, feature requests and questions through the system. Can be accessed by clicking on "Feedback" next to the "Logout" button in the top right.
9.20	Rich Text Editor Upgrade	Rich Text Editor	Performance Enhancement	Component Upgrade	Back-end Rich Text Editor upgrade to optimize performance and browser compatibility.
9.21	Flash SWF Support	Rich Text Editor	Feature Update	New Functionality	Flash .swf files can now be uploaded in any content manager by using the "Insert/Edit Flash" button on the Rich Text Editor toolbar.
9.22	Flash FLV Support	Rich Text Editor	Feature Update	New Functionality	Flash .flv files are now supported by an embedded player and can be uploaded in any content manager by using the "FLV Media Player" button on the Rich Text Editor toolbar.
