

Release Date: July 29th, 2013 IgnitionWeb Version: 3.11

ID	NAME	COMPONENT	CATEGORY	TYPE	SUMMARY
11.1	Category Navigation Enhancement	Media Centre	Feature Update	Usability Improvement	Consolidated same-level nested categories and items into a more intuitive file management structure.
11.2	Thumbnail View Implementation	Media Centre	Feature Update	Usability Improvement	Displayed image thumbnails in item listings for at-a-glance file views.
11.3	Deeper-level Nesting Enhancement	Media Centre	Feature Update	Usability Improvement	Enabled the deeper-level nesting of items within Media Centre categories using drag-and-drop functionality.
11.4	Batch Action Implementation	Media Centre	Feature Update	Usability Improvement	Enabled the activation, deactivation and deletion of multiple items at once within a listing.
11.5	Item Classification Enhancement	Media Centre	Feature Update	Usability Improvement	Allowed for the easy re-categorization of media items via a drop-down menu.
11.6	Media Upload Enhancement	Media Centre	Feature Update	Usability Improvement	Enabled users to upload several files from a single form interface thereby reducing steps in the upload process.
11.7	Media Access Enhancement	Media Centre	Feature Update	Usability Improvement	Provided access to the media category selection tree when uploading new files to Media Centre.
11.8	Media Centre Browser Upload Enhancement	Media Centre	Feature Update	Usability Improvement	Applied consistent naming convention to items uploaded via the Media Centre Browser interface.
11.9	Batch Action Management Enhancement	Media Centre	Feature Update	Usability Improvement	Disabled batch action functionality when no items are selected to maintain category and file integrity.
11.10	Implementation of Google Analytics	Site Statistics	Feature Update	Core Update	Integrated Google Analytics within Site Statistics via API to provide richer, more relevant, real-time statistical information.
11.11	Batch Upload Functionality	Gallery Manager	Feature Update	Usability Improvement	Enabled users to upload multiple files at once into a gallery rather than one at a time.

Release Date: July 29th, 2013 IgnitionWeb Version: 3.11

ID	NAME	COMPONENT	CATEGORY	TYPE	SUMMARY
11.12	Email Anti-Spam Compliance	Mailing List Manager	Feature Update	Core Update	Optimized anchor link coding to prevent flagging of email content by anti-spam software.
11.13	Message Retention Enhancement	Mailing List Manager	Feature Update	Usability Improvement	Provided the option to save a message as a draft when navigating away from the message creation process.
11.14	Email Image Alignment Enhancement	Mailing List Manager	Performance Enhancement	Resolved Issue	Ensured proper presentation of centered media in email headers within Microsoft Outlook and Gmail.
11.15	Unsubscribe Functionality Update	Mailing List Manager	Performance Enhancement	Core Update	Allowed users to populate and edit the unsubscribe message appended to promotional mailings.
11.16	Link Tracking Enhancement	Mailing List Manager	Feature Update	Core Update	Ensured the tracking of all links in outbound email messages by broadening the accepted link structure.
11.17	ZIP File Retention	Mailing List Manager	Performance Enhancement	Core Update	Retained ZIP files uploaded during the message creation process when toggling between steps.
11.18	Optimized Email Bounce Checks	Mailing List Manager	Performance Enhancement	Core Update	Ensured that invalid emails are removed from the subscriber listing for subsequent mailings.
11.19	Subscriber Tracking Enhancement	Mailing List Manager	Feature Update	Usability Improvement	Improved subscriber data tracking to render search, sorting and access to subscriber information easier.
11.20	Automated Maintenance Improvement	Mailing List Manager	Performance Enhancement	Core Update	Improved durability of bounce checker script to ensure that bounce email messages are removed from the server.
11.21	Membership Tracking Enhancement	Membership Manager	Feature Update	Usability Improvement	Improved member data tracking to simplify search, sorting and access to member information.
11.22	Rich Text Formatting Upgrade	EasyText Editor	Feature Update	Core Update	Updated the RichText Editor toolbar for enhanced WYSIWYG reliability, browser compatibility and code purification.

Release Date: July 29th, 2013 IgnitionWeb Version: 3.11

ID	NAME	COMPONENT	CATEGORY	TYPE	SUMMARY
11.23	Item Ranking Enhancement	Core Libraries	Feature Update	Usability Improvement	Introduced drag-and-drop functionality for the ranking of items.
11.24	Google Analytics JavaScript Update	Core Libraries	Performance Enhancement	Core Update	Updated the Google Analytics JavaScript code to enhance tracking and provide additional metrics of user behaviour.
11.25	Browser Compatibility Enhancement	Core Libraries	Performance Enhancement	Core Update	Extended compatibility to Internet Explorer 9/10, Safari 6 and the latest versions of Mozilla Firefox and Google Chrome.
11.26	Rich Text Editor Filter Implementation	Core Libraries	Feature Update	Usability Improvement	Extended the Rich Text Editor form element with a new filter that filters out all empty HTML tags.
11.27	PCI Compliance Update	Core Libraries	Security Enhancement	Resolved Issue	Ensured PCI compliance by protecting against potential cross site scripting (XSS) attacks.
11.28	File Size Reporting Enhancement	Core Libraries	Performance Enhancement	Resolved Issue	Ensured the accurate size reporting of files.
11.29	Time and Date Display Reconciliation	Membership Manager	Usability Improvement	Core Update	Rendered time and date display consistent across Managers.
11.30	Error Catching Mechanism Extension	Core Libraries	Performance Enhancement	Core Update	Improved the robustness of the error catching mechanism in order to identify and report errors more precisely.
11.31	System Library Update	Core Libraries	Performance Enhancement	Core Update	Updated system libraries for added performance, functionality and stability.
11.32	Error Reporting Value Enhancement	Core Libraries	Performance Enhancement	Core Update	Enabled parsing of constants by using actual integer values of desired error reporting levels in development.
11.33	Configuration System Update	Core Libraries	Performance Enhancement	Core Update	Ensured that configuration files are properly written and saved in line with appropriate permissions.

Release Date: July 29th, 2013 IgnitionWeb Version: 3.11

ID	NAME	COMPONENT	CATEGORY	TYPE	SUMMARY
11.34	Job Submission Review Enhancement	Careers Manager	Feature Update	Core Update	Printer-friendly views of job submissions now open in a new window.
11.35	Replacement of Deprecated Functions	Core Libraries	Performance Enhancement	Core Update	Updated old code in order to be compatible with the latest version of PHP (version 5.3).
11.36	Session Storage Optimization	Core Libraries	Performance Enhancement	Core Update	Updated the session handling to improve server performance.
11.37	Shared Third-Party Library Support	Core Libraries	Performance Enhancement	Core Update	Unloaded and dynamically linked data-heavy libraries to improve back-up processing and SVN performance.
11.38	Media Centre Documentation Update	Core Libraries	Documentation Improvement	Core Update	Updated the instructions for uploading files to Media Centre.
11.39	Email Regex Update	Core Libraries	Usability Improvement	Core Update	Updated email regex to allow email addresses with apostrophies to be used in the IgnitionWeb application.
