

Release Date: March 17, 2014 IgnitionWeb Version: 3.12

| ID    | NAME                                    | COMPONENT            | CATEGORY                | TYPE                  | SUMMARY  |
|-------|---|----------------------|-------------------------|-----------------------|--|
| 12.1  | Form Recipient Manager                  | EasyText Editor      | Feature Update          | Core Update           | Allows administrators to manage form submission email recipients and inquiry types within a dynamic back-end interface.                            |
| 12.2  | Media Centre Browser Interface Update   | Media Centre Browser | Performance Enhancement | Usability Improvement | Implemented larger thumbnails, file attribute labels, item highlights, slideshow-style toggling, and more.   |
| 12.3  | Streamlined File Upload Process         | Media Centre Browser | Performance Enhancement | Usability Improvement | Eliminated superfluous process steps and alerts in order to reduce user input requirements.  |
| 12.4  | Image Resize Flag                       | Media Centre Browser | Feature Update          | Core Update           | Allows administrators to choose whether or not large images should be re-sized based on contextual content areas.                                  |
| 12.5  | Advanced Editing Default                | Mailing List Manager | Performance Enhancement | Usability Improvement | Provides users with the Advanced HTML editing mode by default when editing a message uploaded from a ZIP file layout.                              |
| 12.6  | Larger Mailing List Accomodation        | Mailing List Manager | Performance Enhancement | Resolved Issue        | Adjusted PHP memory configurations to accommodate larger mailing lists.  |
| 12.7  | Template URL Fields                     | Mailing List Manager | Feature Update          | Core Update           | Header and Footer images in Mailing List Manager Templates can be assigned URL links.  |
| 12.8  | Broadened Subscriber Search             | Mailing List Manager | Performance Enhancement | Usability Improvement | Expanded subscriber search logic to return "Removed" and "Rejected" subscriber states within the results listing.                                  |
| 12.9  | "In Progress" State for Active Mailings | Mailing List Manager | Performance Enhancement | Core Update           | Mailings in the process of being delivered are transitioned from the "Queued" state to "In Progress," where progress can be observed in real time. |
| 12.10 | Tracking & Profile ID Validation        | Site Statistics      | Feature Update          | Core Update           | Ensures that all Google Analytics tracking and profile ID's are valid in order to maintain proper tracking.  |
| 12.11 | Google Analytics Change Log             | Site Statistics      | Feature Update          | Core Update           | Implemented a change log that tracks which administrators made any alterations to Google Analytics ID's, and when.                                 |
